Apple Mac OS and SCO Unix least vulnerable to attack

London, UK, 16:00 GMT 31 October 2002 – (Excerpt) Based on the number of vulnerabilities announced in 2002 that affect operating systems, the SCO Unix, Apple Macintosh and Compaq Tru64 Operating Systems appear to be the least prone to hacker attack and damage from viruses and worms. This is one of the startling conclusions of the end-of-October 2002 analysis of digital attacks to be released on 1st November.
