

## Apple Mac OS amongst least vulnerable to attack

### mi2g Intelligence Briefing 5<sup>th</sup> November 2002

**(Excerpt)** Since Mac OS has a relatively low visibility, we naturally expect the attacks on Mac OS to be occurring in lower numbers. However, according to our news release from 31st October, attacks on Mac OS systems are less (0.05%) pro rata than what would be expected by solely taking "the security by obscurity" issue into account.
